Nutrition...for people who think™

O-TROPIN®

Sleep, Restore, Recover.

Restorative Sleep, it's much more than melatonin!

Deep restorative sleep is the result of balance among your brain's activity and the balance of a host of hormones. This process is supported by a fully functioning pituitary gland, which is in turn supported by communication between the hypothalamus gland and the pituitary. Orenda O-Tropin is a revolutionary natural supplement designed to support this critical communication activity.

Your pituitary Gland, the Master Gland!

The Pituitary is often called the master gland because it plays a central role in the regulation of other glands in your endocrine (hormone) system. It makes much more sense to support the Pituitary gland in it's natural and normal regulatory process before adding hormones like melatonin while ignoring the central issues in hormone balance and sleep!

**Four sprays in the mouth at night,
and two in the morning, it's that
simple...and very effective!**

State of the art Liposomal Delivery System

Liposomes are an advanced nanotech delivery system that assures the most effective absorption and delivery of important nutrients so that you receive the best possible results!

+ A Healthy Pituitary!

A healthy pituitary has been associated with many of the following benefits:

- Energy and endurance
- Healthy immune function
- Healthy blood pressure
- Libido / sexual function
- Healthy mood and brain activity
- Healthy metabolism
- Lean muscle mass
- Normal sleep patterns

Key Ingredients

INGREDIENT	What does it do?
Alpha GPC (Alpha Glycerolphosphoryl Choline)	A natural choline compound found in the brain, in milk and soy. It is also an acetylcholine precursor which is used as a dietary supplement to enhance sleep memory and cognition. Supports release of HGH and GHRH.
GABA (Gamma Amino Butyric Acid)	<ul style="list-style-type: none">• Stimulates HGH release• Regulates neuronal excitability, relaxes, calms• Improves sleep cycle
Mucuna Pruriens (L-Dopa Bean Extract)	<ul style="list-style-type: none">• Effects neurotransmitters and excites dreaming (REM sleep)• Supports HGH release
Micro-molecular polypeptide complex	Free amino acids consisting of Ornithine Alpha Ketoglutarate, L-Glutamine, L-Arginine, L-Lysine, L-Valine, L-Isoleucine, L-Tyrosine and Glycine. These are the amino acids responsible for supporting the communication between the Hypothalamus and Pituitary.

+ The Difference is in the Delivery

A liposome is a tiny fat bubble. This bubble is made up of layers of phospholipids similar in makeup to our cell membranes. This creates a pouch in which ingredients can be carried, protected and delivered to target tissues in the body. Liposome Technology is a rapidly expanding area of state of the art pharmacology. It is widely recognized as the optimal delivery system of necessary treatments. However, this method is still under utilized in the natural health arena. O-Tropin harnesses the revolutionary nature and effectiveness of this technology.
